

Title VI Service Equity Analysis for June 2023 Service Changes

Prepared February 2023

Purpose

In compliance with Title VI of the Civil Rights Act of 1964, the Federal Transit Administration (FTA) requires all transit agencies receiving federal funding to monitor the performance of their systems, ensuring services are made available and/or distributed equitably. Each transit agency must develop a Title VI Program to document its policies and procedures for meeting FTA requirements. The DART Title VI Program (last updated in May 2022) stipulates that any major service change must be evaluated to determine its impact on minority (race, ethnicity or national origin) and low-income populations.

The Des Moines Area Regional Transit Authority (DART) is the primary fixed-route transit operator serving the Des Moines Metropolitan Area and the largest public transit agency in Iowa. The agency serves 11 cities and other parts of Polk County. Member communities include: Altoona, Ankeny, Bondurant, Clive, Des Moines, Grimes, Johnston, Pleasant Hill, Urbandale, West Des Moines, and Windsor Heights. DART operates Local, Express, Shuttle, and Demand-Response services.

This Title VI analysis will perform the following functions:

- Describe the June 2023 service changes,
- Determine whether the changes constitute a “major service change” or not,
- Evaluate how the changes may impact low-income and minority populations, and
- Identify strategies to avoid, minimize, or mitigate any disproportionate burdens, disparate impacts or any potentially negative outcomes.

Relevant Policies

DART's Service and Fare Equity Policy (approved by the Commission in March 2019 and included in DART's 2022 Title VI Program Update) outlines how Title VI analysis should be performed for any major service change. The following definitions apply to this service change Title VI analysis:

- *Major Service Change*: A major service change is when 25 percent or more of a route's revenue hours or revenue miles is added or reduced, or when the total revenue hours for the system are expanded or reduced by 10 or more percent. (DART 2019 Title VI Program Update, Service and Fare Equity Policy)
- *Disparate Impact*: DART will consider a proposed major service change to have a disparate impact if the affected route's minority population is more than 5 percentage points greater than the system average.
- *Disproportionate Burden*: DART will consider a proposed major service change to have a disproportionate burden if the affected route has a low-income population more than 5 percentage points greater than the system average.

Proposed Route Changes for June 2023

The scope of the June 2023 service changes are to update fixed-route local services in West Des Moines in coordination with a new DART On Demand microtransit zone in the Jordan Creek area. Existing fixed-routes will be modified to match service levels with ridership while maintaining a majority of existing access to fixed-route services.

Table 1 Service Changes for June 2023

Route	Proposed Service Changes
3 – University Av	<ul style="list-style-type: none">• Three new inbound trips
52 – Valley West / Jordan Creek	<ul style="list-style-type: none">• Realign portion of route from Interstate 235/80 to along University Avenue, 60th Street and Vista Parkway in West Des Moines.
72 – West Des Moines Loop	<ul style="list-style-type: none">• Discontinue segment of route along University Avenue, 60th Street and Vista Parkway (to be served by Route 52)• Reduce headway from 60-minute to 80-minute.
74 – NW Urbandale	<ul style="list-style-type: none">• Discontinue 1 partial trip in the morning

Impact of Service Changes

DART policy requires that all major service changes be evaluated for any potential disproportionate burden or disparate impact. The impacts of proposed changes must be calculated to determine whether or not the change is a “major service change.” Route-by-route changes in revenue hours and miles is summarized in Table 2 located in the appendix.

Result: DART defines a “major service change” as when 25 percent or more of a route's revenue hours or revenue miles is added or reduced, or when the total revenue hours for the system are expanded or reduced by 10 percent”. Analysis found the following changes meet the criteria of a major service change: Route 72 – West Des Moines Loop (See Table 3). Thus, changes to these routes will be the focus for the remainder of the report. Changes to remaining impacted routes are not considered a major service change by DART's policy.

Table 2 Major Service Changes for June 2023

Route	Major Service Change
72 – West Des Moines Loop	<ul style="list-style-type: none"> Route 72 operates hourly, 7-days a week in a bi-directional loop in the communities of West Des Moines and Clive. The Northwest portion of the route will be discontinued and the remaining route will be operated as a bi-direction line between Jordan Creek Mall and Valley West Mall. The discontinued portion will be served by Route 52, effectively increasing service levels from the hourly service of Route 72, to a 30-minute service level on Route 52. <p>The population in proximity to the existing route alignment is 23.5% minority and 6.3% low-income. The populations are below the regional threshold and therefore, this change does not create a Disparate Impact or Disproportionate Burden threshold.</p>

Summary of Findings

One route is determined to be a Major Service Change in accordance with DART policy as determined by the decrease in both revenue miles and revenue hours. No route was determined to have a disparate impact or a disproportionate burden.

APPENDIX

Methodology and Analysis

Assessment of Service Proposal for Major Service Change Determination

A major service change is when 25 percent or more of a route's revenue hours or revenue miles is added or reduced, or when the total revenue hours for the system are expanded or reduced by 10 or more percent."(DART 2022 Title VI Program Update, Service and Fare Equity Policy). Table 2 below shows the magnitude of the proposed change by each affected route. Highlighted routes are identified as major service changes.

Table 3 Service Change Hours and Miles Comparison

Proposed Service Changes Revenue Hours and Miles Comparison							
Route	Route Description	Current		Proposed		% change in Revenue Hours	% change in Revenue Miles
		Revenue Hours	Revenue Miles	Revenue Hours	Revenue Miles		
3	UNIVERSITY AVE	44.5	1,147	45.5	1,172	2%	2%
52	VALLEY WEST/ JORDAN CREEK	33.5	1,448	34	1,448	1%	Marginal
72	WEST DES MOINES LOOP	25	777	11.5	409	-54%	-47%
74	NW URBANDALE	5.25	158	5	153	-8%	-3%
	FULL NETWORK	525.5	15,171	513	15,357	-2%	-2%

Geographic Concentrations of Minority and Low-Income Populations

Data Sources and Definitions

Data from the American Community Survey (ACS), DART ridership reporting, and customer surveys were used to perform the Title VI analysis.

2020 ACS five-year estimates provided block-group-level population data for the existing network demographic analysis. For purposes of this analysis, the following origin by race categories were defined as minority:

- Black or African American alone
- American Indian or Alaska Native alone
- Asian alone
- Native Hawaiian or Other Pacific Islander alone
- Hispanic or Latino alone
- "Other" race alone
- Two or more races

Individuals who reported in the ACS that their income over the previous 12 months fell below the federal poverty line were defined as low-income for the geographic analysis.

Population Analysis

Methodology: To evaluate which demographic groups would be impacted by the proposed service changes, geographic concentrations of minority and low-income populations were identified using Geographic Information Systems (GIS) analysis. All Census block groups were joined with 2020 Decennial Census data for demographic data by race and ACS 5-Year Estimate 2016-2020 for poverty. All people living within a half-mile of the DART network were included in the analysis. The percentage of minority and low-income riders for each route were compared to the percentages for the total system, per DART policy. A route with a major service change that serves a population that is 5 percentage points or more above the system average minority population or low-income population would indicate a disparate impact or disproportionate burden, respectively.

Result: Table 4 includes the population and minority and low-income percentages for each route with above-average routes highlighted. Above-average block groups are also identified in Figure 1 and Figure 2.

Table 4 DART Network Demographics, 2020 Decennial Census and ACS 2020 5-Year Average

Minority and Low-Income Population by Route					
Route	Total Population	Low-Income Population	Low-Income Percentage	Minority Population	Minority Percentage
1	30,978	5,804	18.7%	11,759	38.0%
